LARGE FACILITY ENERGY MANAGEMENT

Designed to Save. Built to Last.™

Designed to Save

We are the experts in providing energy reducing solutions with reliable performance and maximum financial benefit.

- 🔗 The only waste oil heating brand approved in all major OEM automotive programs.
- 🔗 Onsite evaluations to ensure our equipment matches your facility's exact needs for size, use and maximum energy savings.
- 🔗 Factory-trained, professional service network to specify, install and provide long-term maintenance to your equipment for the life of the product.
- 🔗 Comprehensive ROI analysis utilizing your data to support your investment decisions.

Lowest Cost of Ownership – Quick Payback – Less Risk

Utilizing your waste oil for heating your facility is your most economical option regardless of what you may be getting paid by waste oil haulers. With EnergyLogic, you stand to recoup your investment in as little as a single heating season or two. Deemed by the EPA as the most environmentally-friendly method of waste oil disposal, our products provide onsite storage and recycling, resulting in the lowest cost and lowest risk of ownership.

Advanced Technology

EnergyLogic is on the leading edge of waste oil combustion technology. Evident by our multiple patents, our equipment has distinguishable performance advantages over any other brand.

Industry's Longest Warranty

Offering 2 years* coverage on parts and 10 years on the heat exchanger exceeds all other brands, and provides total support for your investment.

Ready to Heat - Out of the Box

EnergyLogic systems are designed to be fully automated, requiring no adjustments by your staff... except setting the thermostat.

*One year warranty standard. Second year warranty requires product registration within 30 days of product receipt

Built to Last

Fully Integrated Heating and Cooling Solutions For The Comfort of Your Service Department

Heaters, boilers and HVLS fans that work together to provide alternative energy solutions for year round energy and operational savings with long-term predictability.

AUTOMATED FUEL MANAGEMENT

- Engineered for reliable oil flow from internal or external oil storage to all heating units.
- System integration for complete automation with visual and audible alarms for troubleshooting.
- Exclusive low fuel indicator to help prevent running out of used oil and alleviating the nuisance of shut downs and restarting.
- Fuel storage delivery provides heat reliability as easy as conventional heat.

HEATERS

- Ceiling, wall or tank mount installation options.
- 2 to 3 times the maintenance interval of other brands and the easiest, most cost-effective to clean.
- Designed to eliminate air entrapment for labor-free efficient combustion.
- Integrated air compressor, means no need for shop air, providing 24/7 heat availability.
- Patented burner technology delivers twice the heat for the fastest temperature setting recovery.
- Stainless steel heat exchanger prevents warping, weld breakage and caustic corrosion.

BOILERS

- Built specifically for waste oil from the ground up.
- Every component is designed to maximize performance, making it as reliable as conventional boilers.
- Our automated fuel management system delivers optimum performance to heat water for multiple applications:
 - In-floor radiant heat
 - Ice melt
 - Hot water for carwash
 - Potable water
 - Built in capability to run open and closed loop systems

HVLS FANS

- High volume, low speed fans are efficient and cost-effective supplements to existing heating and cooling systems that create a more comfortable work environment and reduce these expenses an average of 25%.
- Comfortable, quiet non-turbulent air flow.
- Corrosion resistant anodized blades.
- EMI compliant.
- Lifetime warranty on blades, hubs and frames. 12 year service life limited warranty.
- Installation ready with the necessary components – just hang and power the control panel.
- Forward, reverse and variable speed drives.

Unequaled lifetime product support is the assurance your investment will provide savings for decades, not just a few years.

Full Product Life Support

- Only EnergyLogic offers factory direct technical support PLUS a network of authorized service providers.
- Our service professionals across the U.S. and internationally are dedicated to servicing for the life of your product.

Parts & Accessories Availability

- Full line of stocked parts to quickly ship when the need arises.
- Only manufacturer with full feature accessories so you can customize your unit's performance to work best in your service department.

EnergyLogic™ Waste Oil Heaters

Low maintenance and ease of use. Simply set the thermostat and our reliable heat quickly and comfortably heats your service department.

Available in 3 sizes:

140H: 140,000 BTU (41.6 kW) per hour

200H: 200,000 BTU (58.3 kW) per hour

350H: 350,000 BTU (99.6 kW) per hour

EnergyLogic™ Waste Oil Boilers

Designed to maximize performance and functionality by repurposing existing waste oil for multiple heating uses such as radiant floor heat, hot water, ice/snow melt and many applications.

Available in 3 sizes:

200B: 200,000 BTU (58.3 kW) per hour

375B: 375,000 BTU (109 kW) per hour

500B: 499,000 BTU (146 kW) per hour

MacroAir™ High Volume, Low Speed Fans

Cost effective compliment to heating and cooling systems. Creates a comfortable work environment proven to reduce overall energy expenses.

4 styles available from 6' to 24' blade diameters and multiple motor configurations.

Custom colors and logo placement also available.

Where There's Energy, There's Opportunity™

EnergyLogic has been at the forefront of new technologies and innovations since 1984. We are a group of environmentally-aware thinkers and innovators of waste stream recycling and reuse applications. The core of our passion is driven by unique heating systems that are fueled by used oil.

Our products provide a safe manner for recycling your existing oil while reducing, and often eliminating heating bills, hauling risks and liability. Adopted by some of the largest corporations in the world and preferred by independent shop owners across the country.
